

# KS2 Home Learning Grid Summer 2 2020

## Maths

Go on a scavenger hunt, either in the house or outside. For example, you could have a hunt whilst in a walk and see how many sticks you can find, how many berries, how many benches etc.

Then record your findings as a tally chart or turn your results into a bar chart.

## English

Make your own comic book strip. This could be on a fictional hero that you have made up or could be based on an existing comic book. For example, you might want to use ideas from the stories Captain Underpants.

## History

Make your summertime snack into a history lesson by trying a new dish from around the world! You may be surprised to find that your favourite treat is actually an Indian dessert, or you could find a new favourite by trying a Brazilian flavour combination. Tie in your maths skills by measuring ingredients in the kitchen.

*\*Always ask an adult for help when preparing food and using kitchen equipment.*

## Geography

Create your own 'globe' showing the major countries. This can be done any way you wish. For example, either making a 3D model or using a paper plate.

## Art

Using natural materials from outside, try and make your own pictures. You could print off a template and then decorate with your natural resources like the images below.

## Design

It's very rare that we get a lovely English Summer. Follow the link below to learn how to make your own paper kite that can be flown when the weather gets a little windy.

<https://www.instructables.com/id/Easy-Paper-Kite-for-Kids/>

## PSHE

Watch the story 'The Colour Monster' <https://www.youtube.com/watch?v=Ih0iu80u04Y>

Make a list of the different emotions from the story and list the different times that you have felt these things.

You can make this work as creative as you like.

## Science

Make a fairy house in the garden, using pots, moss, bark or leaves etc.

OR

Make a time capsule to detail what you have been up to during the lockdown and keep it safe for the future.

## Health & Wellbeing

During the Summer we sometimes get very hot and sunny weather (although it can be very rare in England!)

Design your own poster or fact file to encourage people to wear sun cream and sun hats when out in the sun.

Dear Parents, during this period of continued school closure, here are some extra learning tasks for children to complete to support their ongoing development of skills and knowledge.

Most of these tasks are loosely linked to the topic of 'Summer' which we would have normally covered in the Summer term in our Topic lessons. Please support and encourage your child with their tasks. These tasks can be completed into their workbooks, done on paper and then stuck in or done on a computer.

Some tasks may have a specific outcome whilst others may be more open ended, allowing your child to decide on the final outcome. Children are reminded that work should be presented to the same standard as we would expect in school.

Daily home learning tasks for English, Maths and Reading will continue to be uploaded to school website for children to complete.

If you feel your child has completed some work that they are proud of please feel free to send me pictures, which I can then upload onto our class news page, if you are happy for me to do that.

Many thanks.
